

Weight

This week, your task is to investigate weight. Some key vocabulary that should be used include heavy, light, heavier than, lighter than, heaviest, lightest, balanced.

When investigating weight, think about the following:

- If something is big, does it mean it is heavy?
- What is heavier than your item?
- Can you find something lighter than your item?

On your daily walk, can you find different items that are heavy? Light? Balanced? How do you know?

If you have some weighing scales at your home, why not bake something and look at the different weights?
