

Parts of a plant.

Can you label the parts of the flower?

Roots

The function of the roots is to anchoring (holding) the plant to the ground and to take up water and nutrients from the soil.

Stem

The function of the stem is to support the plant and keep it upright (standing).

Petals of the flower.

The function of the colourful petals of the flower is to attract insects.

Leaf

The function of the leaf is to absorb (soak up) the sunlight to help make food for itself.

Did you get right?
