Lesson 3 - The Earth's Movement in Space

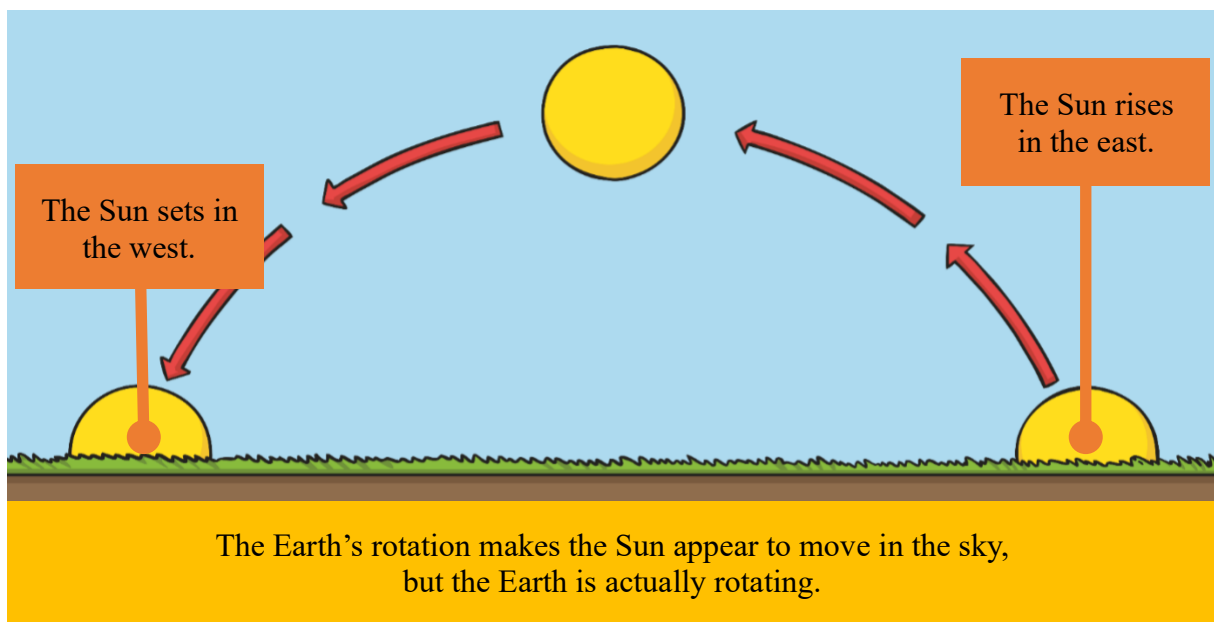

Activity 1:

Open the PowerPoint 'Earth's Movement in Space'.
Read the information carefully. Follow the links to any websites and videos.

The Earth moves in two different ways in space:

The sun does not rotate or revolve like the Earth does.

Complete these sentences.

I know that the Earth _____ the Sun. It takes _____ days for the Earth to orbit the _____ once. Every day the _____ is turning on its _____. This is what makes it _____ and _____.

I know that when the _____ hemisphere is facing towards the Sun it is _____ and when it is facing away from the Sun it is _____.
I know that when the _____ hemisphere is facing towards the Sun it is _____ and when it is facing away from the Sun it is _____.

If you need extra help, find the words you need below:

orbits	365 ¼	Sun	Earth	axis	day	night
Northern	summer	winter	Southern	winter	summer	

Extension:

If you have a globe and a torch at home, why not try the 'Day and Night experiment'? You can find this by following the link to the sheet on Wychall's website.
